GitHub: <https://github.com/KateMajzel>

I finished the Silesian University in the field of study - Physics and Computer Science. My diploma thesis: Pub finder in Katowice with menu, based on SQL database.

I have corporation experience, I worked at a bank, and factory, and I was responsible for communication, organization, and training workshops. I finished the Java course and created projects in Java.

I write books for children and campervan travel during my free time.

Experience: Projects in JAVA:

My resume app – Java, Spring Boot, Hibernate, JPA, SQL, Bootstrap

An application in the spirit of the MVC pattern, connected to SQL database. Allows you to create, read, update, and delete fields. It's similar to a CV generator.

Library app – Java

First codes in Java. Library maintenance program application.

Provides the following options:

- i. adding a book
- ii. adding a reader
- iii. borrowing of the book by the reader
- iv. book return
- v. checking books "in stock"
- vi. see who has the most books
- vii. in which year were the most books published?
- viii. which author has written the most books?

Space station app - Java

A simple console application where the user can check two pieces of information:

- i. the speed of the ISS
- ii. see the number of people in space as part of the ISS

The app retrieves information from JSON files and uses Hibernate to send data to SQL Database.
